

PILLAR

Building the Region: Infrastructure

Overall

Transportation

Water and
Sanitation for a
Growing Economy

Electricity

Communications

Housing

Overall

A healthy, educated population can reach its full potential only if it has adequate infrastructure to support it.

Price infrastructure correctly

Use infrastructure to promote the efficient development of the Region

Use infrastructure to build the private sector

Transportation

A transportation network that connects every inhabited location in the KRI to every other inhabited location in the KRI and to the world.

Continue to develop the KRI as an air cargo hub

Upgrade the Regional road network

Improve mass transportation systems

Water and Sanitation for a Growing Economy

Water security for all, and water and sanitation services that reach every home and supply every industry.

Complete a full hydrological study of the KRI

Complete an integrated water resources management plan

Increase access to clean water

Upgrade sewerage systems

Electricity

Electricity services that are reliable and available to every home and every industry in an environmentally friendly way.

Improve electricity provision

Increase efforts to conserve electricity

Introduce renewable sources of energy

Ensure electricity for industry

Communications

A world-class communications infrastructure that enables uninterrupted voice, video, and data transfer and that includes strong postal services.

Upgrade ICT infrastructure

Create a 21st-century postal system

Housing

A vibrant private housing sector in which all residents of the Kurdistan Region—Iraq have decent shelter.

Improve land-use regulations

Reform land titling and ownership

Encourage the development of mixed-income neighborhoods

Establish a housing-finance system
